BY8 EME Expedition as BJ8TA at NL97UT and OL14KQ
LATEST News from BD5RV, Michael, at BJ8TA 2011-03-22 15UT:
shangri-la is 3300m above the sea level. Working here is a lot more
tired than it used to be. That's why the antenna work takes longer
than expected. yesterday, we also experienced failures in the control
unit of transverter and power supply part of LNA. It also takes
several hours to get them fixed. Anyway, we are going to on air
around the moonrise here today...
